System Control Computer (SCC)

1 Area Control Remote Terminal Unit (A-RTU)

Stand alone/cluster controller for up to 8 remote sites that accepts & executes commands from a System Control Computer or can be a System Controller .

2 Remote Terminal Unit (D-RTU or M-RTU)

For remote site monitor & control. Modular design for upgrades or expansion of I/O. Capable of "Peer to Peer" & "Store & Forward" communications.

3 Solar Remote Terminal Unit (S-RTU or μRTU)

The S-RTU for sites without AC power or the μRTU for powered sites in difficult locations.

4 Auto Dialing Alarm System

With/without a synthesized voice annunciator. Use with touch-tone phones, cellular phones or pagers.
